

SUMMARY

Product design leader with 15 years in enterprise SaaS. Designed AI-assisted operator tools used across 200+ industrial locations, cutting manual monitoring time by 25%. Governed one design system across 12 products at Brightly, acquired by Siemens for \$1.575B. Still ships in code, with two paid AI-agent engagements since 2025 and two apps built solo.

INDEPENDENT WORK

Independent Product Designer & Consultant — Self-Employed

AUG 2025 – PRESENT

Berlin, DE

- For a sim-racing telemetry client, reframed the product as an agentic AI workspace for behavioral data interpretation. Built interactive HTML prototypes of analytical archetypes to improve user performance; the client returned for a second paid engagement covering telemetry visualization, the onboarding funnel, and design tokens shipped as code.
- Designed and built two AI apps solo: Cal, voice-guided training taken from research to live users in five days; and Epilog, which uses Claude to analyze seizure patterns in patient data.
- Working hands-on across the full stack: UX research, interaction design, front-end development (Next.js, React, Tailwind, Supabase), and AI prompt architecture.

EXPERIENCE

Senior Manager of UX Design

JAN 2024 – JUL 2025

Industrial · Raleigh, NC, USA

- Designed AI-assisted monitoring for high-density energy data, replacing manual checks with observability-first systems where operators keep the final decision. **Impact:** reduced manual monitoring time by 25% and increased curtailment accuracy by 30%.
- Directed Yard Management System (YMS) design via on-site field research; synchronized physical operational workflows with digital tracking. **Impact:** generated a new Energy-as-a-Service revenue stream; reduced fuel costs and enabled Scope 3 reporting for carriers.
- Created and governed the design system and processes, including token usage for white-label theming; embedded rapid research and usability testing into agile development cycles.

Product Design Manager and Lead Product Designer

MAR 2016 – DEC 2023

Brightly (a Siemens Company) · Raleigh, NC, USA

- Owned design strategy across every product, vertical, and region for two years before a design director was hired; ran design ops and represented design in the CPO's leadership planning with VPs and directors.
- Directed design strategy through the \$1.575B Siemens acquisition, including the product integration plan, and prepared the team for the Dude Solutions-to-Brightly rebrand. **Impact:** enabled cross-selling opportunities valued at ~\$2M ARR.
- Hired and led a team of 7+ designers across UX, UI, and research, with a principal designer managing the juniors; built career ladders and mentorship programs. **Impact:** achieved lowest team attrition rate in the company.

EXPERIENCE, CONTINUED

Brightly (a Siemens Company) · Mar 2016 – Dec 2023

- Governed one design system across 12 SaaS products in US, UK, and Australian markets, with role-based design tokens, implemented in Vue and documented in Storybook, serving manufacturing, education, healthcare, and government clients. **Impact:** reduced frontend rework and handoff time by ~20%.
- Led the portfolio accessibility program: WCAG in the Definition of Done and in design career ladders, VPAT and Section 508 conformance documentation, screen-reader testing (JAWS, NVDA), and a third-party audit and remediation plan across four products.
- Redesigned the core asset management module for improved user flow and UI. **Impact:** 20% reduction in support calls and 15% increase in user task completion.

UX Designer

MAR 2015 – FEB 2016

Teradata · Raleigh, NC, USA

- Designed a social media marketing management app from the ground up for Teradata's marketing suite, which later became Mapp Digital.
- Designed email marketing platform features with a Munich-based team, inside a ten-person design team spread across the US and Israel; trained a new designer.

UX Designer

MAY 2012 – MAR 2015

Iron Data Solutions (now part of Tyler Technologies) · Raleigh, NC, USA

- Joined as a business analyst and moved into the UX designer role in 2013.
- Designed complex, multi-step interfaces for government licensing; managed high-stakes regulatory requirements and business rules. **Impact:** reduced state inspection processing time by 50% through comprehensive paper-to-digital transformation.

EDUCATION

Master of Education · Lesley University, Cambridge, MA, USA

BA, English Literature · University at Albany, NY, USA

Certified Usability Analyst (CUA) · Human Factors International
